Explanation of symbols	
	The *Warning* symbol precedes warning information that mitigates a risk that is not obvious to the operator. Indicates that a potentially hazardous situation which, if not avoided, could result in harm to the operator or patient. Powered equipment indicates physiological effects not obvious to the user that can cause harm.
	Gamma Sterilization. This simple, proven process is safe, reliable, and highly effective at treating single-use medical devices. With the ability to penetrate products while sealed in their final packaging, gamma irradiation supports the manufacturing and distribution process by facilitating final packaged product as well as raw materials, whilst still ensuring full sterility of the product.
	The *Manufacturer* symbol appears next to the manufacturer's name and address.
	The *Reference* symbol appears preceding the part number for the device. The part number is a unique numeric identifier for the device.
	The *Lot* symbol appears preceding the lot number for a device. Devices manufactured at the same time using identical material and parts will share a common lot number.
	The *Use Until* symbol appears on devices that have an indication of the date by which the device should be used. The date is expressed as the year and month, with the month referring to the end of the month.
	The *Temperature Limits* symbol appears on packages of devices as an indication of the storage temperature limits.
	The *Keep Dry* symbol appears on all packages of devices requiring to protect the packaging from potential damage.
	The *Don't Use If Packing Damaged* symbol appears on all packages of devices requiring to dispose of the device if the packaging has suffered damage.
	The *Accompanying Documents* symbol appears on all packages of devices indicating that instructions for use are available for additional information.
	The *European Community Representative* symbol indicates the identification of the authorized representative for the distribution of devices into the European community.
	Notice of proper disposal
	This indicates that the device should not be re-sterilized after it once has been sterilized.
	This indicates that the item is for single use only and must not be used more than once.
	This indicates biological substances that pose a threat to the health of living organisms, primarily that of humans.
	The ***Serial Number*** symbol appears on devices that require unique identification.
	The ***Single Sterile Barrier system with protective packaging outside.*** This symbol indicates a Single Sterile Barrier system with protective packaging outside.
	The ***Distributor*** Symbol. This symbol shall be accompanied by the name and address of the distributing entity.
	The ***Country of Manufacture*** symbol. This symbol identifies the country of manufacture of the products.
	***Medical Device***. This symbol indicates the item is a medical device.
	***Translation***. This symbol indicates that the original medical device information has undergone a translation which supplements or replaces the original information.
	***Unique Device Identifier***. This symbol indicates a carrier that that contains unique identifier information.
	The *Regulatory Marking of Conformity* symbol indicates that the device meets Medical Device Regulation (EU) 2017/745.
